

Andreas Sehr

Senior Fullstack Developer & Solution Architect | Softbrix AB

Email: andreas@softbrix.se

Phone: 072-501 92 80

Location: Enskede, Stockholm

Availability: August 2026 (for consulting assignments/B2B)

Profile

Senior developer and architect with over 20 years of experience building complex systems from initial idea to finished solution. Expert on the entire stack with a particular focus on Java, Spring Boot, and cloud-based infrastructure.

My philosophy is based on creating solutions that are sustainable and maintainable over time. I have a pragmatic approach to delivery speed but never compromise on security. As a person, I am a humble team player who thrives most when combining deep technical craftsmanship with a strategic holistic perspective. I take active responsibility for supporting my colleagues and often act as a mentor for junior employees to contribute to the team's collective growth.

Consulting Profile & Expertise

- **System Architecture & Holistic View:** Specialist in the interface between UI, APIs, and complex message flows.
- **Modern Stack:** Extensive experience with Microservices, Kubernetes (K8s), and AWS environments.
- **Security & Robustness:** Experienced in environments with extremely high requirements for security and traceability (e.g., Bankgirot and Fintech).
- **Leadership & Mentorship:** Experienced mentor passionate about knowledge sharing and lifting team members.
- **AI Integration:** Active user of modern AI tooling (Claude, Gemini, OpenAI) to accelerate the development process.

Professional Experience

Softbrix AB | Senior Consultant (B2B)

2008 – Ongoing

- Independent business as an IT consultant.
- Assignments covering the entire spectrum within IT, from custom business systems to strategic advice.

Kronans Apotek | Senior Systems Developer

2024 – 2026

- Responsible for information flows for e-commerce.
- Involved in integrations to retrieve prescription information from the Nordic Medicine List (NLL).
- Migration of applications between Kubernetes clusters and adaptation of services after new legal requirements.
- Active support and mentorship for junior employees in the daily work.

Bankgirot | Systems Developer / Solution Architect

2017 – 2022

- Led the development of a new developer portal on AWS for exposing web APIs.
- Implemented lambda services in Golang and Java.
- Responsible for development environments and the toolchain (Gitlab, Jenkins, Jira).

Tech Stack

Category	Technologies
Languages	Java, Golang, .NET (C#), TypeScript, Python, SQL, Kotlin
